### INVISIBLE PERSPIRATION.

THE above figure given to represent the INVISIBLE PERSPIRATION.

It is the great EVACUATION for the impurities of the body. It will be noticed that a thick bloody mucus issues from all points of the surface which indicates the wretched process going forward within.

This perspiration is uninterrupted when we are in health, but ceases when we are sick. It should be the case of every one to see that it is not checked.

It can not be seen without it. It is thrown off from the skin and other parts of the body, and disposed by this means of nearly all the impurities with us.

The blood by this means of SCROFULA, OR KING'S EYE.

This disease is really incurable and hard to be subdued. It is generally seated in the side of the neck, behind the ear, and under the chin.

It affects nearly all parts of the body, and especially the lungs, and produces consumption.

It is a dreadful encumbrance, and this disease is treated from parents to children.

The Salve will extract all the mucus matter by causing the same to discharge, and then the Solar Tincture will drive it to one point which is in a portion of the Ointment.

This is probably the salve and most efficient of any method. It should be adopted without a moment's delay.

At the first only it is in view, — to Restore the INVISIBLE PERSPIRATION. If you can do this, then say we will be free of the rest.

It will be seen therefore that all physicians understand what is necessary to recover, however much they may differ as to the mode of obtaining it.

To give some idea of the amount and quality of the impurities of the INVISIBLE PERSPIRATION, we will state that the learned Dr. Lewin says the great Burke asserted that these gouts of oil we receive into the stomach pass off by this means. In other words, if we eat and drink eight pounds per day we evacuate five pounds of it by the INVISIBLE PERSPIRATION.

This is more other than the used up particles of the blood and other juices, giving place to the new and fresh ones by passing with it all the impurities within it to the surface. It checks therefore to retain in the system five-eighths of all the impurities that it demands from the body. And even when this is the case, the blood is active a principle, but it does not affect the skin, when they form a pimpled eye and other spots, but it is disengaged, and the oil upon the lungs, the consequences are generally fatal.

By a sudden transition from heat to cold, the pores are stopped, the perspiration ceases, and disease begins at once to develop itself. Hence a stoppage of the flow of the jubes, or glands so many complaints. It is through the surface that we imbibe nearly all ourills.

It is by stopping the pores, that it overpowers mankind with coughs, colds, and consumption.

Nine tenths of the world suffer from diseases due to a stoppage of the INVISIBLE PERSPIRATION.

It is easily seen, therefore how NECESSARY it is to the body to have the skin in health, to preserve health. It can not be stopped, it cannot be even checked, without inducing disease. The blood and intestines must have themselves of all their worn-out particles, and poisonous humors and they must go through the pores as nature designed.

Let me ask now, ever carded in mind, what course seems the most reasonable to pursue, to unstop the pores after they are closed, and let the perspiration flow, that the blood may relieve itself of its impurities? Would you give physic to UNSTOP the pores? Or would you apply something that would do this open the surface, while the clogging actually is? Would not this be common sense? And yet I know of no physician who makes any external application to effect it. The reason I assign is, that no medicine within them knowledge, is capable of doing it. Under these circumstances I present to physicians, and to all others, a preparation that has power in the full extent.

Medicinal Affecting Ointment, or the World's Salve. It is a POWER to restore perspiration on the feet, on the head, around old sores, upon the cheek, and upon any part of the body whether disengaged slightly or severely. When the perspiration is restored, it has POWER to penetrate to the lungs, liver, or any other part of the human system, and to act upon them.

It is, however, by separating the loathsome most, passing them therefrom, and expelling them to the surface.

It has POWER to close all external sores, horridous humors, skin diseases, poisonous wounds, to discharge their putrid matter, and then heal them.

It is a REMEDY that sweeps off the whole catalogue of cutaneous disorders and restores the entire epithelio to its healthy functions.

It is a REMEDY that forbids the necessity of so many and deleterious drugs taken into the system.

It is a REMEDY that neither sickens, gives inconveniences or is dangerous to the notes.

This REMEDY is probably the only one known, that is capable of producing all these great results. Its great value is in rendering the circulation of the jubes when checked or disengaged by cold or other causes.

It preserves and defends the surface from all derangements of function, whilst it keeps open the channels for the blood to run all its importance and dispose of all its useless particles.

There is a connection, harmony, and feasibility in all that is a contradiction. It is a simple, but wonderful principle that preserves in health operation the entire machinery of our being.

It influences both to do together the surface and internal Powers, the internal Viscera and the surface. They are inseparably connected and cannot be disjoined. The surface is THE outlet of five parts of the life and used up matter

which is pierced with MILLIONS of openings to RELIEVE the Intestines. Stop up these pores and DEATH knock at your door. It is rightly termed All-Healing, for there is scarcely a disease, external or internal, that will not benefit. It will be found the most useful as well as the cheapest family medicine in the world. I have used it for the last fourteen years with success without a parallel. I have used it for all diseases of the chest, consumption, liver, and the most dangerous of internal maladies. I have used it in cases of extreme peril and hazard, involving the utmost danger and responsibility and I declare before heaven and man, that not in one single case has it failed to benefit when the patient was within the reach of mortal disease.

However, in my recollection, have more than five or six among the thousands who have used it, say that it was not favorable to their complaint. On the contrary I have had hundreds voluntarily, and in the warmest and most patriotic language speak in its praise. I have had physician, learned in the profession, I have had a doctor in the gospel, Judge on the Bench, Aldermen and Lawyers, gentlemen of the highest condition and MULTITUDES of the POOR, use it in every variety of way, and there has been but one voice, one united, universal voice, saying "McAlister, your Ointment is GOOD."

### CONSUMPTION.

Of all diseases, we find that the most important, and concerning which we meet with the most opposition. It can hardly be credited that a salve can have any effect upon the lungs, seated as they are within the mystery. But we say once for all, that the Ointment will reach the lungs further than any medicine that can be given externally. Every body consents to the fact, that if a healing medicine could be applied ON the lungs, there would be great hopes of recovery. The difficulty is to get it to medicine there. Now the Salve has the wonderful virtue of extracting the pusied, diseased humors from all external pores, by reducing them to discharge in the manner it operates upon external ulcerations by driving off all the impurities through the pores to the surface. This with Consumption placed upon the chest it penetrates directly to the lungs, separated the poisonous particles from other outlet, it will cleanse life. This is the secret to success. Persons to whom the Salve is given, are immediately relieved.

OLD-SORES, MORTIFICATIONS, ULCERS, ETC.

There is no effectual way of getting these but by drawing off the putrid matter. To merely dry it up and only remove out the healthy part. We say once for all, that the Ointment will reach the lungs further than any medicine that can be given externally. Every body consents to the fact, that if a healing medicine could be applied ON the lungs, there would be great hopes of recovery. The difficulty is to get it to medicine there. Now the Salve has the wonderful virtue of extracting the pusied, diseased humors from all external pores, by reducing them to discharge in

the manner it operates upon external ulcerations.

PERSONS.

I never saw any good in this Salve. It can not be used to distract the mind, and avoid the slightest cause of alarm. Persons to whom the Salve is given, are immediately relieved.

"TOILET."

I have kept up this for the dressing case.

Although I am not a doctor, I am not ignorant.

They will strike it against the hands.

They bring their Oil-skin and once will restore the hair to their former.

Persons to whom the Salve is given, are immediately relieved.

SOULS, MORTIFICATIONS, ULCERS, ETC.
